

THE PLATINUM PACKAGING GROUP

145 MODEL TRAY SEALER

FOR PLASTIC OR
PAPERBOARD TRAYS

The **Platinum 145 Model** is our most compact automatic Filled Tray Sealer. Measuring only 5.5 feet from end to end, the 145 Model packs a lot of performance into a small foot print...ideal for those applications that require high output from a physically small space.

While the overall length is small, the 145 Model is big in its size range, accommodating film widths to 10.5". This means you have the versatility through interchangeable pallets to seal a wide size range of containers. You can seal

smaller containers two at a time using the 145 Model's dual lane capacity.

This tray sealer is portable. It comes standard with casters and plugs into a 110-volt electrical circuit giving you more flexibility to place the sealer where you want it in your packaging room. And most important, it's designed for easy cleaning to help you meet strict sanitary requirements, thanks to wash down construction from the level of the pallets to the floor.
