150s MODEL SERVO CONTROLLED HORIZONTAL WRAPPER

- ◆ **SPEED TO 150+
PACKAGES PER
MINUTE**
- ◆ **TOUCH SCREEN
CONTROL**
- ◆ **FLEXIBLE PACKAGE
SIZE RANGE**
- ◆ **COMPACT DESIGN**

Platinum's 150s Model 3-axis Servo Controlled Horizontal Wrapper is designed for operating speeds to 150+ packages per minute with the flexibility and control available from servo controlled motors...and the Model 150s performs all these functions in a compact size.

A sharp, conveniently placed **Touch Screen** displays the status of the wrapper and offers fast access to the many features selectable through the touch screen. You may store settings for up to 30 different products that can be quickly recalled. Additional screens can be accessed to display maintenance information.

Platinum's 150s Model uses the Indramat system of Sercos controlled servomotors, one of the highest levels of machine control offered today. And this control is very flexible and can be expanded to talk with other Sercos controlled machines up or downstream from the Model 150s.

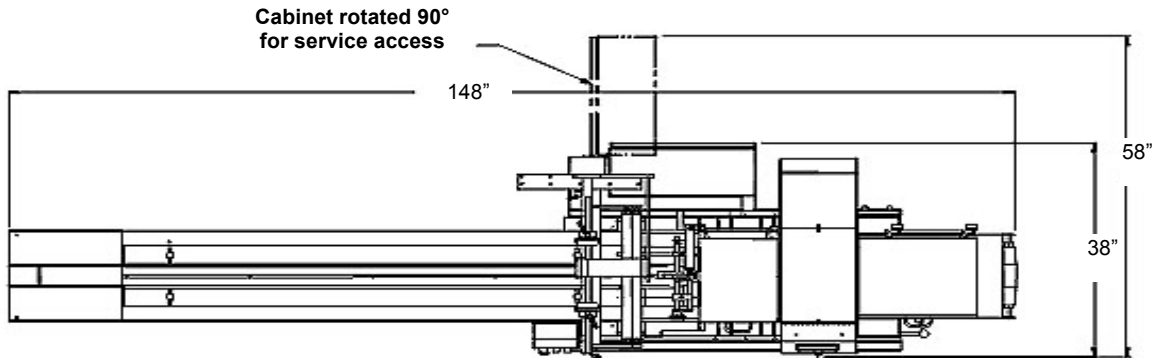

Many other features are included in the *new* 150s Model including a new infeed conveyor with stainless steel side skirting and new guarding over the fin seal and discharge conveyor area for improved accessibility. Optional features include no-product-no-bag and no-gap-no-seal. All this and more from the Platinum 150s Model.
